

# Open Day 2019

Cloud Prisma Margin Estimator

Jesper Christiansen & Martin Zemlicka

26 September 2019

# Contents

**2** Functionality, use case overview

---

**3** Technical overview, cloud and Kubernetes

---

**17** Future developments + Q&A

---

---

# cloud Prisma Margin Estimator - Functionality

## Asset classes

- OTC trades: IRS, FRA, OIS, Basis swaps
- Supported formats: FpML, Eurex OTC reports, Eurex Margin Calculator CSVs
- ETD positions: all Eurex and ECC derivatives

## Features

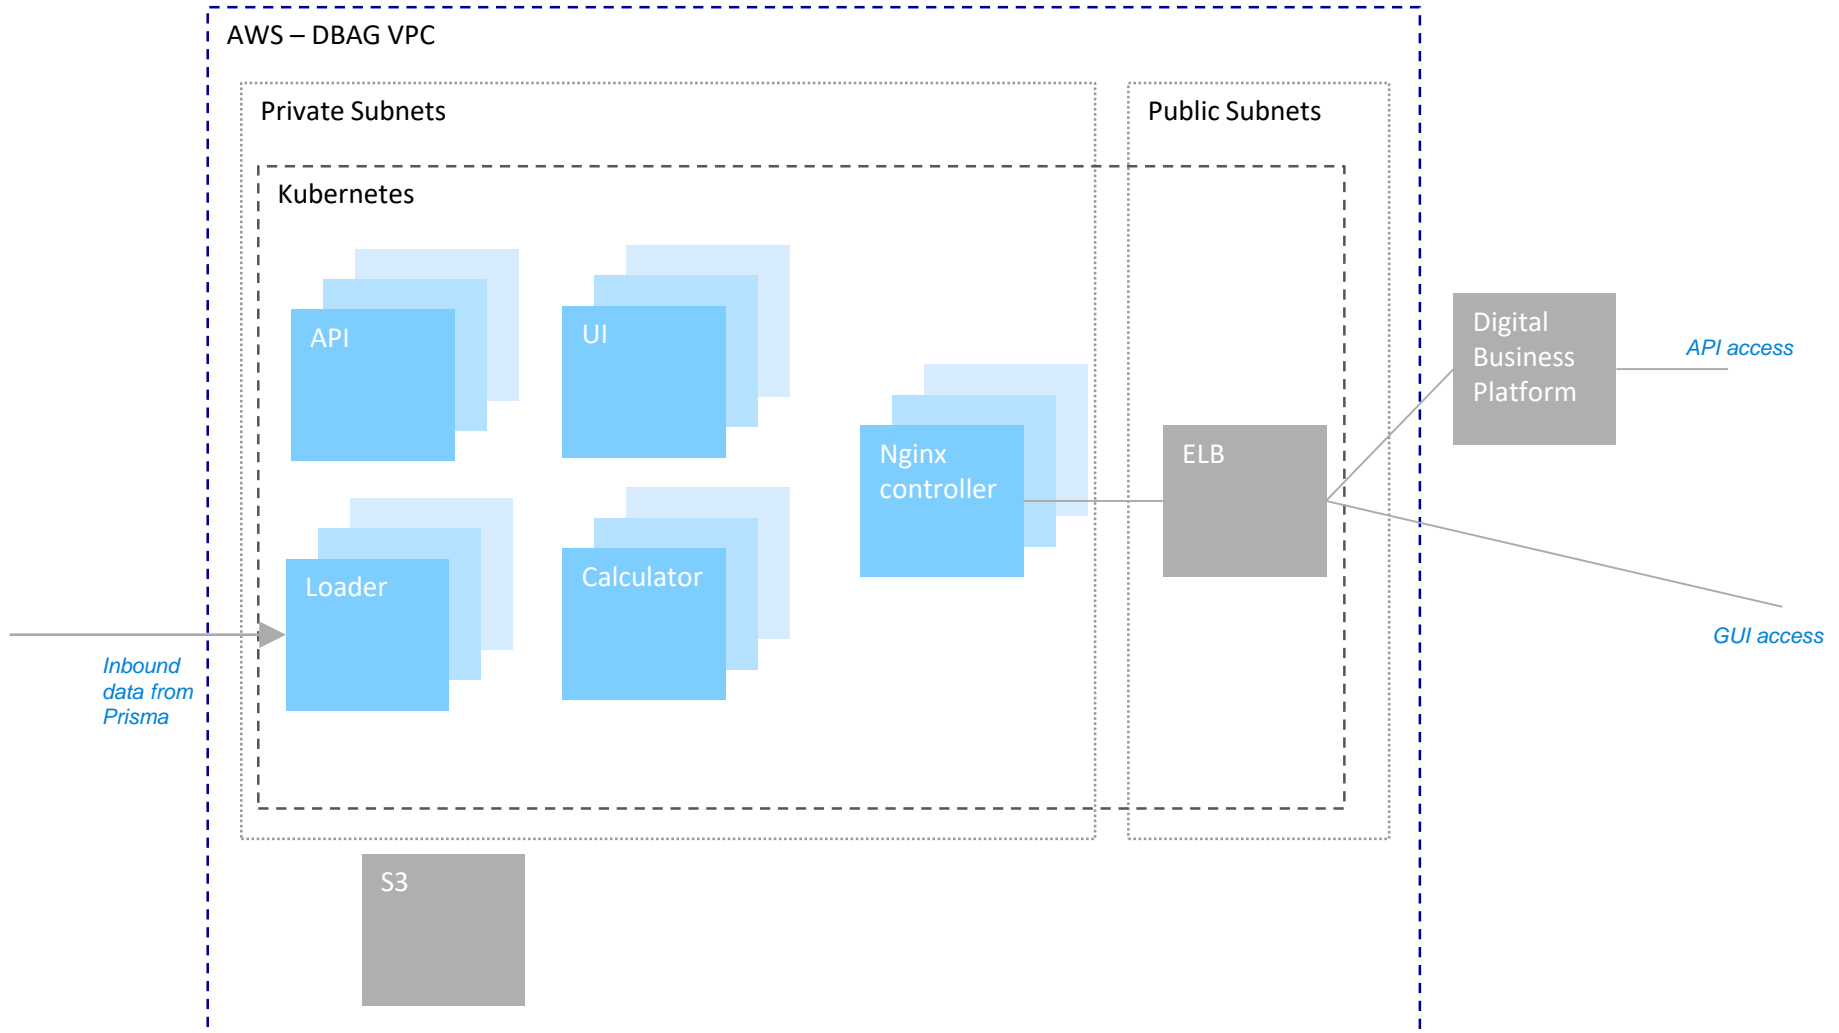

- cross-margining between OTC and Fixed Income ETD
- exact production margin replication for ETD
- mark-to-market value and DV01 sensitivity for OTC
- intraday margin updates for ETD
- API with all the above plus historical calculation, greeks etc.

## cloud Prisma Margin Estimator – Technical overview

cPME is designed and operated as a cloud native application. Core tenants:

- Stateless + container based
- Kubernetes
- Everything as code
- Public cloud

# Architecture diagram

## cloud Prisma Margin Estimator – Technical overview

cPME has a microservices based architecture:

- Loader(s)
- API endpoint(s)
- Pricer(s)
- Front-end(s)
- Webserver(s)

Containers are the primate that works for us: lightweight, secure, **standard**.

Storage is hard → make the cloud provider do it

Planning, monitoring, logging, etc are common → Kubernetes

## cloud Prisma Margin Estimator – Technical overview

*Kubernetes is to the cloud what Linux is to the server*  
— Kelsey Hightower

## cloud Prisma Margin Estimator – Technical overview

If somebody does something for you  
it means you don't have to think about it.

The public cloud's scale does a lot for us.

## cloud Prisma Margin Estimator – Technical overview

# Everything as code

## Don't do anything “by hand”

**To be efficient, automate.**

**To be secure, be machine readable.**

**To be compliant, be auditable.**

## cloud Prisma Margin Estimator – Technical overview

### Lessons learned:

1. Use containers
2. Build micro-services
3. Embrace commodities
4. Version control everything
5. Automate automate automate
6. It's still hard 😊

## cloud Prisma Margin Estimator – Future developments

- Inflation swaps
- What-if functionality – margin change for additional trade(s)
- Simplified UI entry of OTC trades and sensitivities
- Calculation of OTC sensitivity for uploaded portfolio

# Disclaimer

Deutsche Börse AG opens up international capital markets for its customers. Its product and service portfolio covers the entire process chain – from pre-IPO services and the admission of securities, through securities and derivatives trading through the settlement of transactions and the provision of market information to the development and operation of electronic trading, clearing and settlement systems. With its process-oriented business model, Deutsche Börse increases the efficiency of capital markets. Committed employees are the key factor for innovation and further growth: without them, Deutsche Börse Group would not have developed into one of the most modern exchange organisations in the world. More than 5,000 employees work for the Group – a dynamic, motivated and international team.
