Total	80,309	289,113

In the financial year 2019, a total of 1,407 MWh of energy (5065.7796 GJ) was sold or fed.

The conversion of megawatt hours into gigajoules is based on standardised conversion factors. Otherwise, commonly accepted standard factors such as DEFRA or IEA are used.

302-2 Energy consumption for business trips (shuttle bus between Eschborn and Luxembourg, company cars and flights)

We do not collect data on the average fuel consumption for our company cars; instead, we used the national average for new car registrations (5.9 l / 100 km). Energy consumption figures for flights taken as part of business trips are based on the person kilometres flown. The average figure for this published by the Bundesverband der Deutschen Luftverkehrswirtschaft (BDL, the German Aviation Association) is 3.64 l / 100 km per passenger. The consumption values of the shuttle buses are based on the data of the transport company (depending on the size of the bus between 10 l and 29 l / 100 km).

Deutsche Börse Group managers hold annual appraisal discussions with employees within their area of responsibility, jointly defining targets for the next year and they document these discussions. 95 per cent of employees recorded in Deutsche Börse Group's internal staff performance appraisal

per cent of employees recorded in Deutsche Borse Group's internal staff performance appraisal system received an assessment last year. The remaining 5 per cent are subject to the following special provisions:

- In accordance with the company agreement, German employees aged 59 and over can waive the annual assessment and target agreement process.
- Newly hired employees receive an assessment and target agreement for the first time following their probationary period.

The appraisal system is applied equally to female and male employees. For managerial staff, a separate target-agreement system exists, which is used for all managerial staff to hold discussions. Subsidiaries not fully consolidated or incorporated into German Group operations use their own appraisal systems. The data compiled by these subsidiaries is currently not maintained or made available centrally.

Since the assessment system is equally applied to women and men, there is no separate gender classification.

For data protection reasons further diversity aspects are not listed here.

To counteract the systematic discrimination of women or men in remuneration, Deutsche Börse AG regularly analyses whether there are gender-specific differences in compensation for employees in Germany. Detailed information on the analysis results is confidential and therefore not listed here.
