

## China Europe International Exchange

# The first authorised trading platform for RMB and Chinese investment products outside Mainland China

China is a major and growing economic player and for capital markets with increasing relevance. The opening of the Chinese financial market and the internationalisation of renminbi (RMB) will shape the global financial landscape.

CEINEX, China Europe International Exchange, a cooperation between Shanghai Stock Exchange, China Financial Futures Exchange and Deutsche Börse has the mission to establish and develop a new global liquidity pool dedicated to RMB denominated products based on Chinese assets.

### Leverage your FWB® membership to offer new trading opportunities in RMB products to your clients

Trading in RMB products is easy. As a Xetra® member you can use the reliable Deutsche Börse infrastructure for trading, clearing and settlement. A new admission is not required. Your own trading system needs to support transactions in RMB.

### Make use of existing regulatory framework under European law

Trading takes place in European regulatory environment and time zone with existing infrastructure and license with well known central securities depository.

### Cash market products will be available soon

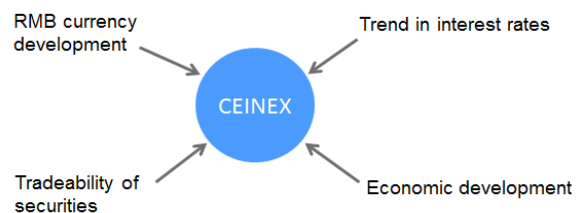

Market launch for China-related cash products in new currency RMB is scheduled for 18 November

2015. The product offering starts with ETFs and bonds. Further cash products will follow successively. The development of innovative China-related derivatives tradable in RMB is in progress and will follow in a second phase.

### Advantages for you and your clients

- Facilitated investment opportunities in mainland China capital markets
- Trading in European regulatory environment and time zone
- No change in trading and clearing interfaces

### Global relevance of China
