# VAT rules for financial and insurance services today and tomorrow

lds marked with * are mandatory.	ls marked with *
----------------------------------	------------------

#### Introduction

#### Objective

The objective of this public consultation is to obtain the views of stakeholders and public authorities of the Member States on the current VAT rules for financial and insurance services and their functioning as well as on possible changes to these rules. The answers provided will feed into the review of the relevant provisions of the VAT Directive and will contribute to a possible future legislative proposal.

#### Context

The current VAT rules for financial and insurance services are criticised for being **complex**, **difficult to** apply and for **not having kept pace with the developments of new products and services**. This seems to have led to a lack of **VAT neutrality**, **legal uncertainty** and **high administrative and regulatory costs**.

VAT is a tax levied on the consumption of goods and services within the European Union. It is a multi-stage tax calculated, and thus charged, on each stage of the value chain. Operating businesses pay the VAT due on their supplies at regular intervals. This is the VAT due on their outputs – the output VAT – after deducting the VAT on their inputs – the input VAT. The system of deduction ensures that the tax is neutral, with respect to the length of the supply chain and the number of transactions therein. However, where the output supply is exceptionally not taxed because it is exempt or out of the scope of the application of VAT, the right to deduct does not hold.

#### Main issues under the current rules

However, under the current rules, financial and insurance services constitute an exception to these principles: as listed in Article 135(1)(a)-(g) of the VAT Directive, most of them are exempt from VAT. The reasons behind the introduction of the exemption are multiple, but mostly related to the technical difficulty to calculate the tax amount. However, these rules were introduced in 1977 and have since become outdated.

Because of the exemption, the providers of financial and insurance services **cannot deduct the VAT incurred on inputs**, notably – but not exclusively – on investment goods, that are used to produce exempt outputs. This deprives the tax of its neutrality: unlike for other businesses, who can deduct it, VAT becomes a cost for providers of financial and insurance services, and, eventually, for their customers (as the so-called 'hidden VAT').

To address the problem of hidden VAT, the VAT Directive provides for a number of structural provisions:

- The option to tax allows providers of financial services to charge VAT on certain otherwise exempt services, and thus to increase the proportion of taxed turnover and the corresponding input deduction. It is, however, up to Member States to introduce such an option and it is not available to insurance service providers.
- More commonly, financial and insurance service providers make use of two other existing instruments to minimise irrecoverable (hidden) VAT: VAT groups and – until recently – costsharing arrangements.

Since financial and insurance service providers are usually part of large company groups or other networks, these two instruments, albeit being different from a legal perspective, allow them to centralise at group level common business functions (e.g. IT services, accountancy, regulatory compliance, back office support, tax advisory) without generating irrecoverable input VAT on intra-group charges. However, on the one hand, the Court of Justice of the European Union (CJEU) in 2017 found cost-sharing arrangements used by financial and insurance operators inadmissible (see judgements 1, 2 and 3). On the other hand, the VAT grouping scheme is limited exclusively to operators established in the same Member State and is implemented (if at all) in various ways across the EU. This raises the question of how to address the problem of hidden VAT in this important economic sector.

Apart from the implications of this recent case law, the VAT treatment of financial and insurance services raises other problems. The current rules are believed to be **complex** and **difficult to apply in practice**, and possibly **have not kept pace with the developments of new services** in the financial industry (for example services linked to crypto-assets and e-money). This seems to have led to **increasing litigation before the CJEU**, **legal uncertainty** and **high administrative and regulatory costs**. Moreover, such rules are interpreted and applied inconsistently by Member States, which contributes to **distortions** within the EU and in exchanges with third countries.

The Commission proposed to review the rules on the VAT treatment of financial and insurance services already in 2007 through a legislative package that comprised <u>a proposal for a Council Directive</u> and <u>a proposal for a Council Implementing Regulation</u>. However, the discussions in the Council came to a standstill and the proposals were withdrawn in 2016.

Against this background, as announced in the Communication on an <u>Action Plan for fair and simple taxation supporting the recovery strategy</u>, the Commission is currently preparing a proposal to review the VAT rules for financial and insurance services. This initiative is part of the objective to simplify the life of taxpayers operating in the Single Market, one of the priorities laid down in the Political Guidelines for the present Commission.

## Glossary

Terms used in this context:

- **Taxable amount**: the amount in respect of a taxable transaction upon which VAT is chargeable.
- Output VAT: the VAT due on taxable persons' supplies' or outputs.

- **Input VAT**: the VAT paid by taxable persons for supplies made to them with regard to their business activity.
- Hidden VAT: a consequence of the exemption; input VAT becomes irrecoverable and increases
  costs for service providers while being invisible to customers as not invoiced as such to them.
- VAT neutrality: one of the most important principles of the VAT system, ensuring that the VAT due
  by the final consumer is the same, regardless of the nature or length of the supply chain for
  producing it; VAT is collected fractionally via a system of partial payments whereby at each stage of
  the supply chain, the taxable person deducts input VAT paid from the output VAT collected.
- Option to tax under Article 137(1)(a) of the VAT Directive: an optional regime allowing financial service providers to consider otherwise exempt supplies as taxed.
- VAT grouping under Article 11 of the VAT Directive: a simplification measure that allows, if introduced by the Member State, groups of 'legally independent' persons 'closely bound to one another by financial, economic, and organisational links' to be treated as a single taxable person. Consequently, intra-group transactions become, from a VAT perspective, "intra-company" supplies and thus fall outside the scope of the tax and do not result in irrecoverable input VAT.
- Cost-sharing arrangements under Article 132(1)(f) of the VAT Directive: an exemption allowing amongst others providers of certain exempt services to form 'independent groups', to pool the acquisition of input supplies and re-distribute the costs, from the group to its members.
- Proportional (pro rata) deduction based on Article 173 et sec. of the VAT Directive: Member
   States may apply different methods to determine the input VAT that can be deducted in the case of a taxable person supplying taxed, exempt and out-of-scope services.
- **Fee-based taxation**: a method of calculation of the taxable amount based on the remuneration linked to financial and insurance services.

The Commission will publish all contributions to this public consultation. You can choose whether you would prefer to have your details published or to remain anonymous when your contribution is published. Fo r the purpose of transparency, the type of respondent (for example, 'business association, 'consumer association', 'EU citizen') country of origin, organisation name and size, and its transparency register number, are always published. Your e-mail address will never be published. Opt in to select the privacy option that best suits you. Privacy options default based on the type of respondent selected

#### \*14 Contribution publication privacy settings

The Commission will publish the responses to this public consultation. You can choose whether you would like your details to be made public or to remain anonymous.

# Anonymous

Only organisation details are published: The type of respondent that you responded to this consultation as, the name of the organisation on whose behalf you reply as well as its transparency number, its size, its country of origin and your contribution will be published as received. Your name will not be published. Please do not include any personal data in the contribution itself if you want to remain anonymous.

### Public

Organisation details and respondent details are published: The type of respondent that you responded to this consultation as, the name of the organisation on whose behalf you reply as well as its transparency number, its size, its country of origin and your contribution will be published. Your name will also be published.

I agree with the <u>personal data protection provisions</u>

## Information about your business

- \*15 What is your main activity?
  - Mainly financial services
  - Mainly insurance services
  - Both financial and insurance services
  - Other services
  - 16 Please indicate which other service(s).

DBG appreciates the opportunity to provide input to the consultation. As a market infrastructure provider, we offer a set of different services along our entire value chain. However, these services differ in their nature. To illustrate, services that DBG offers in terms of providing an infrastructure, such as access to trading systems as well as the provision of corresponding functionalities, e.g. for matching should continue to qualify as IT services. In this specific regard DBG does not provide any brokerage services and therefore, in line with the principle of VAT neutrality these services fall outside the scope of the exemption. However, this does not account for other services provided along the value chain such as clearing services, that clearly qualify for exemption under the VAT directive, or for custody and settlement services which are considered taxable.

- \*18 What type of supplies do you make?
  - Mainly Business-to-Business (B2B)
  - Mainly Business-to-Consumers (B2C)
  - Both
- \*19 Which markets do you provide financial and/or insurance services to?
  - National market only
  - National market and market(s) of other Member States
  - National market, market(s) of other Member States, and market(s) outside the EU

## Your experience with the current rules

20 The exemption of financial and insurance services from VAT was introduced in 1977 as an exception to the general rule that VAT is to be levied on all services supplied for consideration by a taxable person. To what extent do you agree that the exemption is still needed?

Strongly agree

<ul> <li>Agree</li> <li>Neutral</li> <li>Disagree</li> <li>Strongly disagree</li> <li>Not sure</li> </ul>	
21 In general, how would you assess the functioning of the exemption of financial and insurance services?  The exemption  works very well  works well, but could be improved  works poorly and should be improved  should be removed  No opinion	al
22 Please indicate the reason(s) why.  The exemption  Multiple answers possible  □ is too costly to apply □ is too complex in terms of notions (structural provisions and the definitio of exempted services) □ is not clear in terms of notions (structural provisions and the definition of exempted services) □ may have a distortive effect on competition with businesses in other Member States □ Other □ No opinion	
24 How do you estimate the impact of the lack of input tax deduction and hidder VAT?  Multiple answers possible  ☐ They create a price barrier to outsourcing ☐ They undermine the level playing field between providers of outsourced services and in-house providers ☐ They affect the business structures of those operating in the financial and insurance sector ☐ They increase the costs for business customers	1

	They increase compliance costs

im	To what extent are the foreign VAT rules for cortant when deciding whether to establish ate?  Very important Important Not very important Not important at all No opinion				

Multiple answers possible
Option to tax
✓ VAT grouping
Cost-sharing arrangements
Proportional deduction
Other
None
34 The exemption was put in place i.a. due to the technical difficulty to calculate the
axable amount. To what extent do you agree that progress in technology,
enhanced transparency rules and experiences gained from other countries and
rom other indirect taxes could help overcome this issue?
Strongly agree
Agree
Neutral
Disagree
Strongly disagree
Do not know
35 Do the current VAT rules for financial and insurance services result in prices
ower than those that would apply if these services were taxed?
Yes, but just for final non-taxable customers
Yes, for all customers
In part, due to other similar taxes
No
Do not know

32 Which of the structural provisions listed below do you apply?

36 To what extent are the current structural provisions effective in increasing the deduction of input tax and reducing the impact of hidden VAT?

	Not effective at all	Somewhat ineffective	Neither effective nor ineffective	Somewhat effective	Very effective	No opinion
Option to tax	0	0	0	•	0	0
VAT grouping	0	0	0	0	0	0
Cost-sharing arrangements	0	0	0	0	•	0
Proportional deduction	0	0	0	•	0	0

37 VAT provisions related to financial and insurance services can be perceived as complex. For which of the current structural provisions is that correct? Multiple answers possible Option to tax VAT grouping Cost-sharing arrangements Proportional deduction None 38 To what extent do you agree or disagree with the following statement: The lack of input tax deduction is detrimental to the financial and insurance sector. It compels the sector to outsource services which are typically provided in-house, thus raising the costs. Strongly agree Agree Neutral Disagree Strongly disagree Do not know 39 Unless you make use of the option to tax, does your business incur any costs related to irrecoverable (hidden) VAT? Yes O No Do not know My business is applying the option to tax 40 To what extent do you agree that the current VAT rules are fit to cover emerging trends in the industry (such as digitalisation)? Strongly agree Agree Neutral

Disagree

Strongly disagree

Do not know

41 The VAT treatment of emerging trends under the current VAT rules for financial and insurance services can be problematic due to unclear definitions for VAT purposes. In connection with which of the emerging trends listed, do you consider this correct?

1110 00110011
Multiple answers possible
Services provided by means of fintech
E-money
Services linked to crypto-assets (such as mining)
Payment services
Other
Do not consider it problematic
Do not know
43 The regulatory framework in the financial and insurance sector (e.g. the Markets in Financial Instruments Directive (MIFID) and the Insurance Distribution Directive (IDD)) has strengthen the role of intermediaries. Do you consider the VAT exemption to be coherent with this development?  Yes  No  Do not know
Possible changes to the current rules
The Commission is intending to prepare a proposal that will seek to modernise the current VAT rules for financial and insurance services. Your answers will feed into the review of these rules.
44 In your view, which would be the best way to reform the rules on exemption?
Multiple answers possible
Update definitions of exempt services drawing on the extensive CJEU case law in the field of VAT
As regards the definitions, refer to other EU regulations governing the financial and insurance sector
<ul><li>Removing the exemption, so that definitions will be no longer needed</li><li>Other</li></ul>
Do not know

45 Please indicate which other way(s).

To ensure the consistency and applicability of the rules; definitions shall be aligned with current financial market regulation and judicature. This will allow to streamline and clarify while providing for a level playing field among member states to apply accordingly. As outlined under question 16. the multitude of services provided by market infrastructure providers differ in nature and the specifics must be taken into careful consideration.

46 The removal of the exemption for financial and insurance services could benefit the neutrality of the VAT system. What could be other effects of such a removal?

fultiple answers possible
■ Simplification in the application of the VAT rules for financial and insurance
services
Lower VAT compliance costs
Less distortive effect of the exemption on competition linked to suppliers
from non-EU countries operating in the EU
Higher VAT compliance costs
Higher complexity of VAT rules
None
Other

#### 47 Please indicate which other effect(s).

The removal of the VAT exemptions for financial and insurance services will require financial and insurance service providers to charge the VAT on their services. As the additional VAT charge will be passed along the value creation chain, it is the end client who will ultimately need to pay the additional VAT charge, effectively resulting in a price increase for end clients demanding financial and insurance services.

Higher prices for such services may disincentivize end clients, such as investors, retail and professional alike, or businesses to engage in Europe's financial markets. This could have adverse effects on the Capital Markets Union, whose aim is to strengthen the attractiveness of Europe's capital markets as well as the overall financial markets in order to foster economic growth in the European Union following the COVID-19 crisis. Also, in the context of Brexit, there is now an even more urgent need to strengthen the financial markets within the EU-27 in order to avoid competitive disadvantages.

Against this background, any removal of VAT exemptions for financial and insurance services should therefore be carefully considered.

48 If only fee-based financial services were to be taxed, in relation to which of them
would it be difficult to determine the taxable amount?
Please explain.

deduction, but it is up to each Member State to introduce such option. Should Member States keep that discretion?  Yes  No, it should be available in all Member States  No opinion
50 Not having a right of deduction when supplying exempt financial and insurance services impairs the neutrality of VAT. To what extent would you support or oppose the introduction of a fixed rate of input tax deduction to remedy that effect?  Strongly support Support Oppose Strongly oppose No opinion
51 If a fixed rate of input tax deduction was introduced, should such a rule remain optional for operators or, alternatively, should it be mandatory?  It should be optional  It should be mandatory  No opinion
52 Should cost-sharing agreements be made available to the financial and insurance services sector?    Yes  No  No opinion
53 In your view, should businesses established in other Member States be allowed to form part of the cost sharing arrangements?    Yes  No  No opinion
54 Please indicate the reason(s) why.  Multiple answers possible

- To boost competitiveness of financial and insurance service providers
- ▼ To reduce the tax burden and the administrative costs of businesses operating at cross-border level
- Other

# 58 Which is the most beneficial aspect of establishing VAT groups for providers of financial and insurance services?
