High Level Encryption Roadmap

Password Encryption

ETI HF

Key Features

- Session and user password encrypted
- No certificate required, password encryption with Deutsche Börse's public RSA key
- Implementation as per ETI manual, OpenSSL helpful for cryptographic part
- Append log-in time before encryption > T7 will validate the time > encrypt password > convert binary output to alphanumeric value > enter password to field 1402
- Example python script "STEP"
- Further details available
 - Network Access Guide & ETI documentation

Overview Rollout Approach

Session Source Location	Session type	Encryption type	Mandatory change in Simulation	Mandatory change in Production
In Equinix FR2 co-lo facility	ETI (LF)	Payload or Password	24.11.23	11.12.23
In Equinix FR2 co-lo facility	ETI (HF)	Password	24.11.23	11.12.23
In Equinix FR2 co-lo facility	ETI (HF)	Payload	Not supported	Not supported
Remote*	ETI (LF)	Payload	04.08.23	23.10.23
Remote	ETI (LF)	Password	Not applicable	Not applicable
Remote	ETI (HF)	Not applicable	Not applicable	23.10.23**

* Please note that remote refers to outside Equinix FR2.

** The use of HF Sessions in Production outside of Equinix FR2 co-location facility will no longer be available.

Mandatory Interface Encryption

As a trading venue operator, Eurex needs to adhere to requirements regarding encryption of data during transfer via networks on public ground and the encryption of credentials during transfer via networks on non-public ground (Critical Infrastructure KRITIS) regulation.

Eurex has implemented mandatory changes regarding data transmission via the T7 trading interfaces. These changes have been made to improve the security of information transmitted via communication networks to further reduce the risk of unauthorized interception, manipulation, or misuse.

To support Trading Participants with the implementation of their security requirements, Eurex offers additional connectivity options to implement Transport Layer Security (TLS) for sensitive data in critical business areas.

The following steps will be carried out during 2023:

Session Source Location	Session type	Encryption type	Mandatory change in Simulation	Mandatory change in Production
In Equinix FR2 co-lo facility	ETI (LF)	Payload or Password	24.11.23	11.12.23
In Equinix FR2 co-lo facility	ETI (HF)	Password	24.11.23	11.12.23
In Equinix FR2 co-lo facility	ETI (HF)	Payload	Not supported	Not supported
Remote	ETI (LF)	Payload	04.08.23	23.10.23
Remote	ETI (LF)	Password	Not applicable	Not applicable
Remote	ETI (HF)	Not applicable	Not applicable	23.10.23*

Mandatory Interface Encryption

As a trading venue operator, Xetra-Börse needs to adhere to requirements regarding encryption of data during transfer via networks on public ground and the encryption of credentials during transfer via networks on non-public ground (Critical Infrastructure KRITIS) regulation.

Xetra-Börse has implemented mandatory changes regarding data transmission via the T7 trading interfaces. These changes have been made to improve the security of information transmitted via communication networks to further reduce the risk of unauthorized interception, manipulation, or misuse.

To support Trading Participants with the implementation of their security requirements, Xetra-Börse now offers additional connectivity options to implement Transport Layer Security (TLS) for sensitive data in critical business areas.

Timeline

Session Source Location	Session type	Encryption type	Mandatory change in Simulation	Mandatory change in Production
In Equinix FR2 co-lo facility	ETI (LF)	Payload or Password	24.11.23	11.12.23
In Equinix FR2 co-lo facility	ETI (LF)	Password	24.11.23	11.12.23
In Equinix FR2 co-lo facility	ETI (LF)	Payload	Not supported	Not supported
Remote	ETI (LF)	Payload	04.08.23	23.10.23
Remote	ETI (LF)	Password	Not applicable	Not applicable
Remote	ETI (LF)	Not applicable	Not applicable	23.10.23*

* Please note that remote refers to Xetra Equinix FR2

Focus Call - Mandatory Interface Encryption

Session will start soon

Further Information

- Circular 2023-2023: T7 mandatory interface encryption - Updated information on ETI (LF) payload encryption and additional support for TLS 1.3
- Circular 2023-2023: Updated information for the implementation of mandatory interface encryption to strengthen the protection of critical information infrastructure
- Circular 2023-2023: T7 connectivity options - Implementation of additional options to strengthen the protection of critical information infrastructure

T7 Release 12.0

With T7 Release 12.0 the following enhancements will be introduced:

- MiFID II MiFIR enhancements
- Introduction of a new Crossing Procedure and Pre-Arranged Trade Entry Possibility
- Introduction of Total Return Futures Delta Neutral Strategies
- Enhancements of the Transaction Size Limits regime
- Usage of the Legal Entity Identification for the identification of the Buy-Side Disclosure Clients

Simulation start: 11 September 2023
Production start: 20 November 2023

FAQs

1. What certificate is required?
2. Is there any latency impact?
3. Are new sessions needed?
4. Can ETI LF sessions also be password encrypted?
5. How often are you going to update the public RSA key?
