

Latency was just the Beginning

The New Drivers of Trading Infrastructure

Eleni Coldrey

Business Development Director, Financial Services

**The next infrastructure
advantage will not be
measured in
microseconds**

Four forces are reshaping the trade lifecycle

Infrastructure planning must follow the trade lifecycle, not organisational boundaries.

Extended and continuous markets

Fewer natural breaks

Tokenisation and market interoperability

More rails, fragmented liquidity

AI moving selectively into production

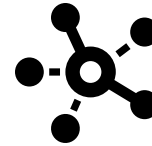

Intelligence and execution connect

Compressed risk and post-trade cycles

Less time to act

Business-Ready Platform

The infrastructure your strategy
needs is increasingly specific

Workload Fit

Power and technical environment

Location Fit

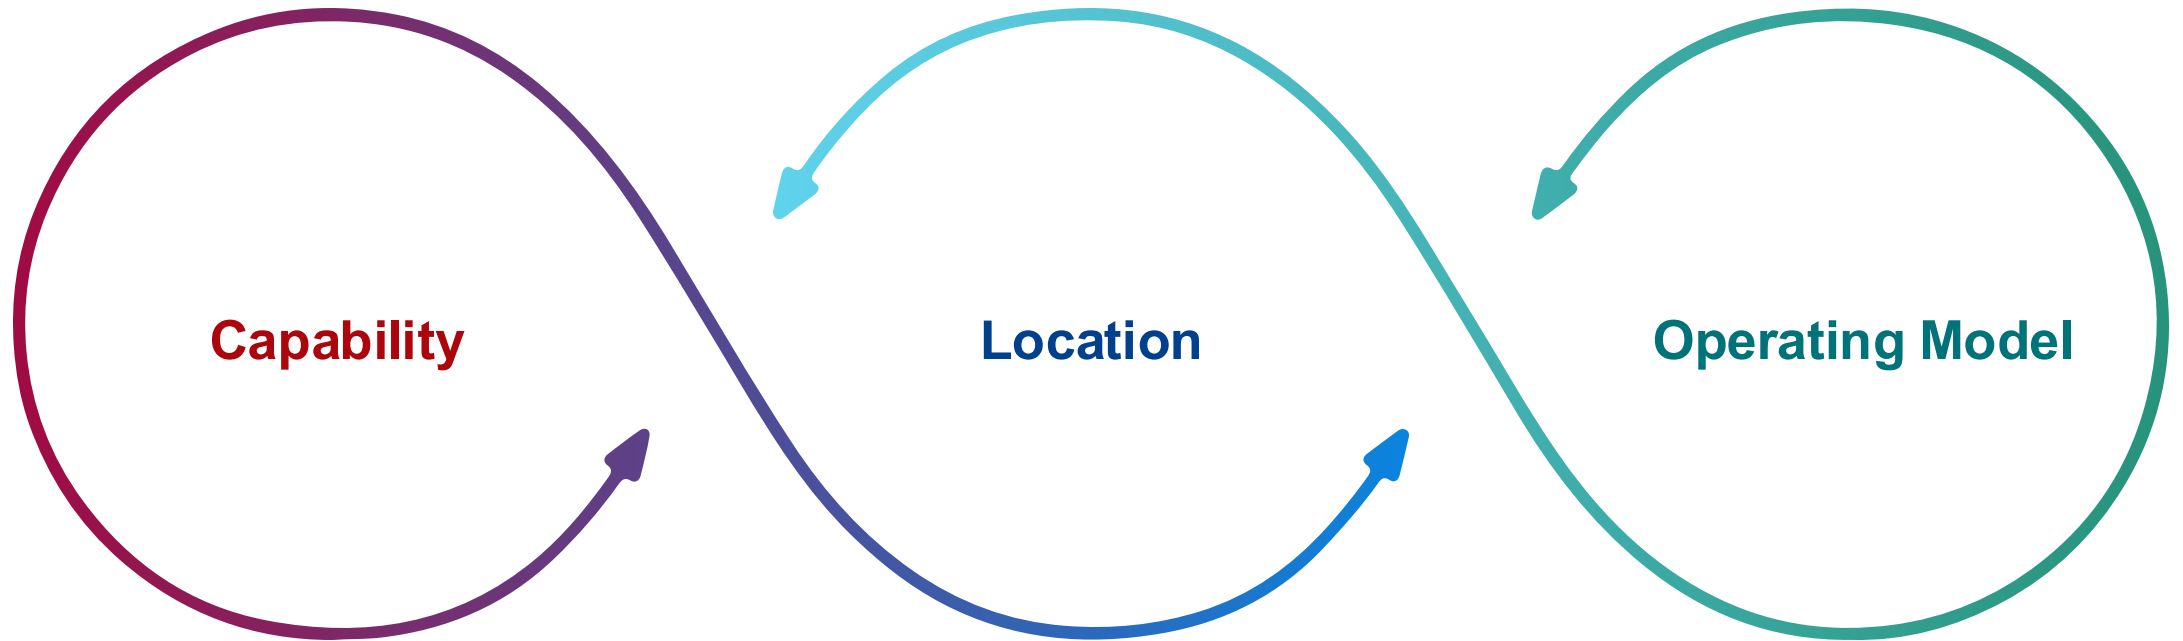

Data exchange and ecosystem access

Future Flexibility

Delivery and operating model

You cannot predict every opportunity

Yet, your platform must be ready to pursue it

175+ Execution Venues

1550+ Financial Services firms

We see what is
changing in trading,
and what is being built
beyond it...

10,000+
customers
globally

60%+
of the
Fortune 500

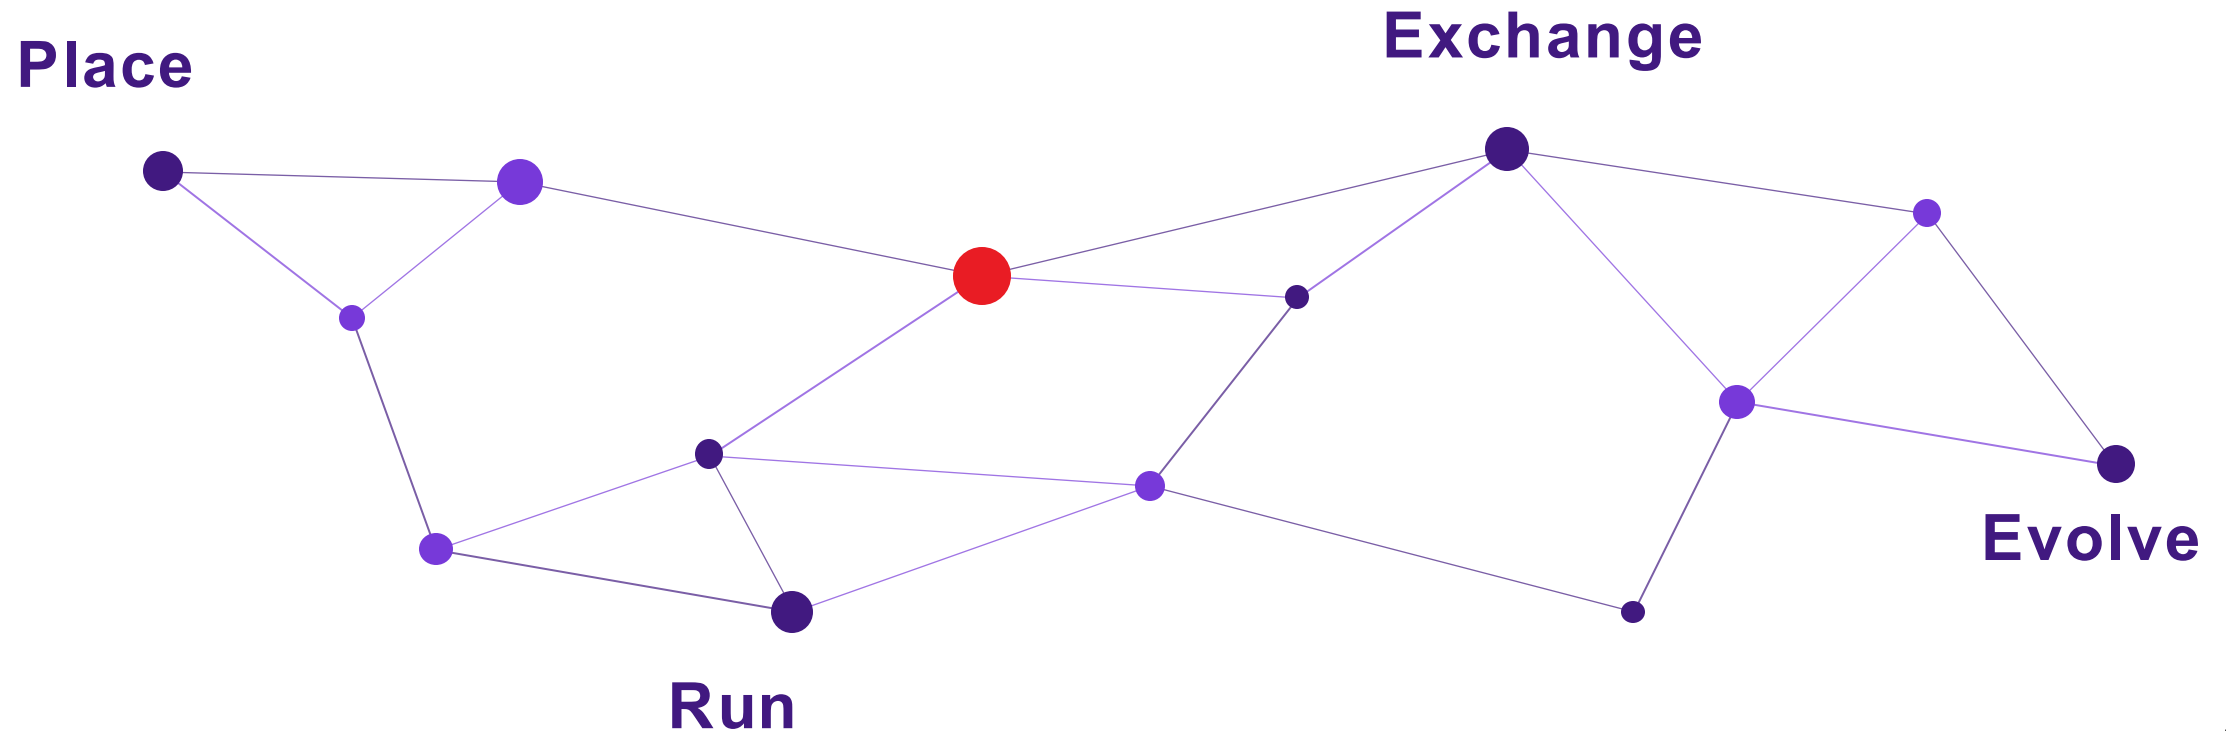

44%+
of the Forbes
Global 2000

Different workloads.

Different environments.

One connected platform.

Our platform continues to evolve as your requirements evolve

CREATE NEW VALUE

- Continuous markets
 - Tokenization
- AI-native workflows
 - Quantum

ACCESS

- New markets
- New locations
- New workloads

CONNECT

Cloud · AI · Partners · Data

**Is your platform ready for where
your strategy may take you next?**
